

Supplemental Fig. 1. Co-Immunoprecipitation of recombinant MLH3 and MLH1

Whole cell extract (WCE) and co-immunoprecipitates from GFP and TagRFP antibodies (IP α GFP and IP α TagRFP, respectively) of a GFP-MLH3 and TagRFP-MLH1 co-expressing 293T single clone were submitted to western blotting using antibodies as indicated on the right.

Supplemental Fig. 2. Reconstitution of 293T with MutL α

Recombinant MutL α complexes of co-expressed mCherry-MLH1 and GFP-PMS2 in MMR-deficient 293T cells are shown before (left) and after UVA irradiation (right).
